About me

Full-stack .NET developer with proven experience building and supporting Microsoft Dynamics 365 and Azure solutions for New Zealand government justice sector applications. Joined the New Zealand Parole Board Hearing Management System (PBHS) at go-live and led Early Life Support — resolving production defects, performing root-cause analysis, and delivering rapid hot fixes that kept a critical national system stable under pressure.

Delivered custom C# plugins on Dataverse, Power Automate flows, and Azure Logic Apps that successfully bridge modern Dynamics 365 platforms with legacy .NET systems. Strong full-stack capability across C#, .NET, Oracle PL/SQL and JavaScript on large enterprise codebases. Maintain an active personal portfolio in TypeScript, React/Next.js and Python, and use AI coding agents daily to accelerate investigation, development and remediation.

Experience

Developer at DXC Technology (Sep 2025 - ongoing)

Dynamics 365 Development & Plugins

- Designed and delivered custom **C# plugins** on **Dynamics 365** that automated complex business logic and orchestrated dependent updates across hearing and decision workflows.
- Delivered production bug fixes and features while supporting testers and contractors and produced clear documentation that improved hand-over for future support engineers.

Integration & Automation

- Built and stabilised **Power Automate Cloud Flows** and **Azure Logic Apps** that integrated PBHS with the legacy IOMS .NET system, enabling reliable data exchange between modern and legacy systems.
- Diagnosed and resolved integration failures across Azure services, maintaining continuous operation of critical inter-system processes.

Production Support & Go-Live

- Resolved production defects during PBHS go-live and Early Life Support, performing root-cause analysis using Azure monitoring and logging tools, and delivering rapid hot-fixes that maintained system stability for the New Zealand Parole Board.
- Leveraged AI coding agents (Claude Code) daily to accelerate investigation, code search and remediation - significantly improving delivery velocity and quality during high-pressure support windows.

Collaboration & Delivery

- Partnered with Business Lead, Release Manager, Tech Lead, IOMS team, and Account Run Lead to successfully coordinate releases and maintain clear stakeholder communication through a complex inter-system rollout.

Associate Developer at DXC Technology (Feb 2024 - Sep 2025)

Full-Stack Development & Legacy Modernisation

- Delivered feature enhancements and production bug fixes across the full stack of the Integrated Offender Management System (IOMS) – **Oracle PL/SQL**, **C# ASP.NET MVC** and **WCF** services, and Kendo UI for **jQuery / JavaScript** frontend on a 20+ year enterprise codebase used daily across Corrections.
- Modernised legacy code as part of ongoing system uplift, applying established data patterns to improve long-term maintainability of a large, complex platform.
- Built deep domain knowledge of the IOMS model (offenders, victims, sentences, transfers) and the patterns that enforce data integrity and audit traceability.

Delivery Practices

- Delivered work across multiple test environments under a monthly release cadence using **Azure DevOps** and **TFS** for source control and work tracking.
- Contributed to code reviews, pair programming, and technical documentation that improved long-term maintainability of a large enterprise system.

Projects

Personal Portfolio: brendan-jarvis.vercel.app/

Modern serverless developer portfolio and technical blog built with Next.js (App Router), TypeScript, Tailwind CSS v4, Clerk authentication. Deployed on Vercel with continuous deployment.

TECHNOLOGIES: NEXT.JS, TYPESCRIPT, REACT, TAILWIND CSS, VERCEL, SUPABASE.

Whisper Subtitles: github.com/brendan-jarvis/whisper_subtitles

Python command-line tool that discovers local media files, generates accurate subtitles using OpenAI Whisper, applies post-processing corrections for common transcription errors, and packages releases via GitHub Actions. Demonstrates practical machine-learning integration, robust file-system handling and automated CI/CD.

TECHNOLOGIES: PYTHON, OPENAI WHISPER, GITHUB ACTIONS

Education

Dev Academy (2022) – Certificate in Applied Software Development.

College of Law (2018) – Professional Legal Studies. Admitted Barrister and Solicitor of the High Court of New Zealand.

University of Otago (2011-2015) – **Bachelor of Laws (LLB)** and **Bachelor of Science** in Chemistry (BSc). Additional Computer Science and Web Development study.

Technical Skills

Languages: C#, TypeScript, JavaScript, Python, SQL (Oracle PL/SQL, SQL Server), HTML, CSS

Microsoft Stack: ASP.NET Core and Framework, Dynamics 365, Dataverse, Power Automate, Azure Logic Apps, Azure Storage, API Management

Frontend: React, Next.js, Tailwind CSS, shadcn/ui, Kendo UI for jQuery

Cloud & DevOps: Azure, Azure DevOps, Git, GitHub, GitHub Actions, TFS, Vercel

Tools: Claude Code, Visual Studio, VS Code, Cursor, Neovim, PowerShell, WSL/Linux.
